PROFESSIONAL SUMMARY

Software developer and cybersecurity-focused engineer building AI systems, backend applications, and security tools. Experienced in Python, FastAPI, Electron, and AI integrations using multiple APIs and local models. Committed to rigorous continuous learning and technical mastery, dedicating over 20 hours per week to active development.

TECHNICAL SKILLS

Languages	Python, C++, JavaScript, HTML, CSS
Frameworks & Tools	FastAPI, Electron, Git, GitHub, Linux, REST APIs
Artificial Intelligence	Ollama, OpenAI, Anthropic (API integration, local model deployment)
Cybersecurity	TryHackMe, Hack The Box, Password Security Scripts, Vulnerability/Virus Scanning Tools

KEY PROJECTS

Shadow AI – Flagship Desktop Assistant Sole Developer

- Designed and engineered a modular, full-stack desktop assistant architecture entirely from scratch using **Python, FastAPI, and Electron**.
- Integrated cloud-based AI APIs (**Google Gemini, OpenAI, Anthropic**) alongside local models using **Ollama** to allow robust offline and hybrid capabilities.
- Invested **200+ hours** of standalone development, ensuring rigorous testing, optimal latency, and responsive interface design.

Cybersecurity & Automation Utilities Python 3

- Password Security Script:** Developed a custom utility in Python 3 to securely evaluate, benchmark, and strengthen credential entropy and security compliance.
- Virus Scanner (In Progress):** Architecting a localized file-scanning script to cross-reference hash patterns and perform behavioral evaluations on simulated payloads.

Personal Portfolio Website HTML, CSS, GitHub Pages

- Designed, developed, and deployed a responsive personal portfolio site ([shadowfox486.github.io](#)) to present open-source projects, technical blogs, and active repository status.

TECHNICAL EXPERIENCE

Technical Support Specialist – *Hutchinson Central Technical High School*

Buffalo, NY

- Provided high-tier hardware and software technical support directly to faculty, classmates, and administrative staff.
- Diagnosed, isolated, and resolved network connectivity, operating system, and hardware peripheral faults systematically.

EDUCATION

Hutchinson Central Technical High School

Buffalo, NY

Credential: Graduated High School Diploma (Technical Focus)

Advanced Standing: Completed **25 SUNY College Credits** during high school enrollment.

Advanced Placement (AP) Coursework: AP Computer Science, AP Calculus/Math, AP English, AP US History.
